Trading futures, foreign exchange (forex), contracts for difference (CFDs), and other leveraged financial instruments carries a substantial risk of loss and is not suitable for every investor. The high degree of leverage can work against you as well as for you. Before deciding to trade, you should carefully consider your investment objectives, level of experience, and risk appetite. The possibility exists that you could sustain a loss of some or all of your initial investment, and therefore you should not invest money that you cannot afford to lose.
